

Dear Madams and Sirs

Introduction of our companies

Valve Service Pein KIG (www.vs-pein.com) is an industrial service provider based in Switzerland with international focus and is specialized in valve and actuator service of IMI / CCI brands like:

Sulzer, BTG, DRAG, STI, B&R, Zikesch, Korea Valves, Japan Valves, etc.

In the past we could finalize several field service operations in nuclear and fossil power plants, oil and gas fields and chemical industry.

The founders and managers of the company Mr. Mario Pein & Mr. Wolfgang Steiner have a very long-term background and experience regarding the industrial valve services, and they are specialized valve technicians (supervisors) with excellent references that can be provided if required.

Complete Valve overhaul

Valve Service Hellas O.E. (www.vs-hellas.com) is an ISO 9001-2015 certificated fully equipped workshop near Athens/Greece, which is specialized in the industrial valve services. Even now **Valve Service Hellas O.E.** has a big range of satisfied customers such as: Hellenic Petroleum, Aspropyrgos refineries, Elefsina refineries, Motor Oil Hellas, Korinthos Power, Heron, Elpedison, Protergia and DESFA LNG terminal located in Revithousa island and additional plants that make use of our services.

The founders of the company are Mr. Mario Pein, Mr. Nils Drosse and Mr. Wolfgang Steiner. The management and technical department of the company is accomplished from Mr. Stylianos Kallergis and Mr. Nikolaos Kallergis. Mr. Stylianos has a 45-year experience on the valve service industries and therefrom 25 years on the American territory located in Houston TX. Mr. Nikolaos has a long-term background on the onsite valve services as an experienced supervisor. Both have extensive references that can be provided on request.

VS-Hellas is an official certificated **Emerson** service provider (www.emerson.com) and also the official Agent of Slade, Inc. patented sealing products (www.slade-inc.com) in Greece.

Our offers

1. Personnel pool of more than 20, thereof up to 12 former IMI (CCI/Sulzer/BTG/Bop&Reuter), field service technicians with international experience.
2. Field service technicians who are often familiar with your plant
3. Service at all IMI/CCI valves such as BTG, DRAG, Sulzer, Bop&Reuter, Korea-Valves, Japan-Valves and their hydraulic or pneumatic actuators
4. Fair price-performance ratio
5. Flexible and short decision-making paths
6. Service also on valves from other manufacturers than IMI/CCI
7. A full fitted valve repair workshop near Athens
8. On-site treatment, spare parts and refurbishment from a single source based on our partnerships

Partnership

Spare parts:

CPC (Carter Process Control)

Carter Process Control (www.carterprocess.com) is a well-known manufacturer of spare parts for CCI/BTG valves.

For the product line of CCI/BTG and CCI/Drag valves, we can provide all associated spare parts. For this purpose we require the following information if possible.

1. Top assembly drawing
2. Control valve datasheet (CVDS)
3. Bill of materials (part numbers)

If you are not in possession of that information, please submit the OEM part number.

The replacement parts are manufactured in Austria and other Central European countries.

All parts can be manufactured and delivered quickly. The maximum lead time of the most complex parts is only 12 weeks.

The quality of the replacement parts completely matches or even exceeds the standards of the Original Equipment Manufacturer (OEM). Our spare parts are replaceable regarding their form, fit and function.

The benefits for our customers are speed of service from the enquiry to delivery plus a huge cost saving.

Our highest goal is a satisfied customer. For this reason we were already able to accomplish exceptional performance in case of emergency in relation to delivery time of parts and assembly as well as solutions on site. This enabled our customer to put his plant as quickly as possible into operation.

CPC also stocks a large amount of soft goods including all gaskets, packing sets, balance seals and many more along with all pneumatic soft goods kits for IMI actuators. In addition, CPC also stocks the OP nozzles in large quantities which can be shipped to the customers at the same day.

Valve Service-Pein KIG is the official CPC Agent in Switzerland, Austria, Germany, Spain, Portugal and Greece.

We provide a high leveled customer support and assure response to any request within one working day.

Partnership

Refurbishment:

BVT Austria for refurbish / repair and manufacturing of parts

Together with BVT Austria (www.bvt.at) one of the leading coating companies in Europe we are repairing, refurbishing and producing all kind of valve parts, e.g. ball valves, plug seat, plug pilot seat or stem packing area.

BVT can refurbish and repair all kinds of parts like pump shaft, sleeves, O-ring or sealing areas.

Refurbishment and repair with special Coatings saves a lot of money and time for our Customers.

Special coatings, for example:

Cobalt-Chromium Alloy matrix for wear resistant coatings.

Chromium Carbide: Compared to coating materials containing Tungsten carbide, coating materials that contain chromium carbide can withstand higher service temperatures up to 870 °C (1600 °F).

Possible manufacturing fields:

Special grinding after coating also on complicate silhouettes

Special Ceramic coating -> Sealing areas with Stellite -> all types of Stellite coating applications.

The coating material depends on where and in which area of a system the parts are installed -> regarding temperature, pressure and chemical properties of the medium.

Possible processing areas:

- Shaft
- Plug/Shaft-seat
- Gland area
- Plug
- Piston
- Pump-shaft, Rollers
- Bearing shells
- Bushes

Almost all parts are repairable!

For any request or more details please do not hesitate to contact us!

Naturally, BVT is with newest machinery also able to produce all kind of new parts with or without coating.

- Turning: max. \varnothing 1100mm / max. length 4000mm
- Milling: max. (l*w*h) 2200x600x720mm
- Circular grinding inside/outside: max. \varnothing 830mm; max. length 4000mm
- Surface grinding: max. (l*w*h) 900x400x450mm
- Welding

Recycling and emergency stock

Valve Service Pein started 2020 a new project.

In times when sustainability, recycling and resource reuse are becoming more and more important, Valve-Service Pein KIG has now started a great new project. We are looking for repairable valves and inlets to overhaul and store them for customers emergency cases.

We buy from your plant:

For example after upgrade, valve change or shutdown of the plant.

Complete valves (used or new), spare parts (hard and soft) which are required no more.

Our focus is on valves and actuators from IMI / CCI brands like Sulzer, BTG, DRAG, STI etc.

If you dispose this kind of products don't hesitate to contact us!

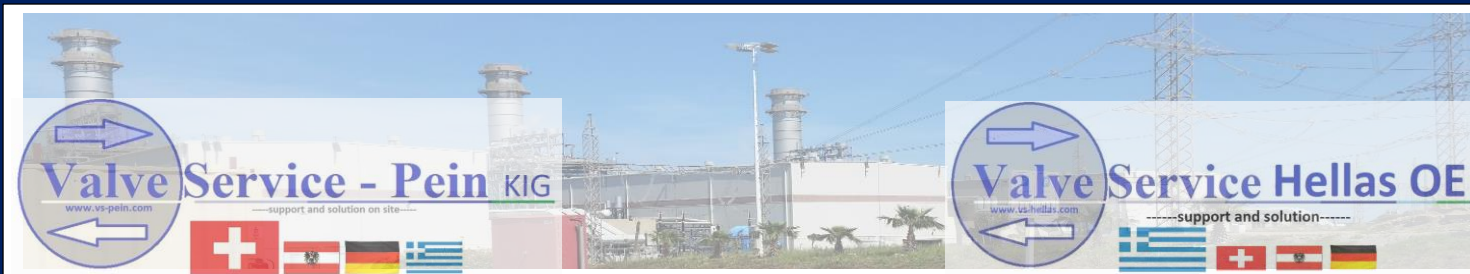

Best regards / freundliche Grüsse
